

Year 4 Autumn 1

Home learning

This half term we are going to be learning about Animals including Humans in our science lessons and Mountains in our geography lessons. Please choose one activity from either subject to complete.

The deadline for projects to be uploaded to Google Classroom or brought into school is Monday 16th October 2023.

Mountains

1. Choose one of the world's highest mountains and create a PowerPoint/ Google Slides presentation all about it to show your class. Don't forget to include lots of interesting images and information.
2. Write an information book explaining how different types of mountains are formed. Include labelled diagrams showing each type. You could look at fold, block, dome, volcanic or plateau mountains and give examples of each mountain type.
3. Create fact files about famous mountaineers such as George Mallory, Sir Edmund Hilary or Nimsdai Purjar.

Animals Including Humans

1. Draw a diagram or create a model of the human digestive system showing all the main parts and organs. Could you research the function of each part and include this in your diagram/ model?
2. Find a mirror and have a look at your teeth. Notice the different sizes and shapes as you look from the front to the back of your mouth. Humans have four types of teeth; incisors, canines, premolars and molars. Use information books or the internet to research about the four types of teeth. Include the name of each tooth, what the tooth looks like, where it is found

and its function. You could present your work as a report or diagram or model.
