

Year 6 Autumn 2

Home learning

This half term we are going to be learning about World War 2 in history lessons and Electricity in our science lessons. Please choose **one** activity from either subject to complete.

The deadline for projects to be uploaded to Google Classroom or brought into school is **Monday, 11th December 2023**.

World War 2

1. Use your research skills to find wartime recipes for meals that people made using their rations. Choose one of the recipes and with an adult, make your chosen meal. Review the meal, considering the method, appearance, taste and possible improvements.
2. Use a range of sources to create a non-chronological report about the Blitz around Britain. Note down and group your findings on a mind map, then use this to create your non-chronological report. Include a title, opening paragraph, subheadings, interesting facts, precise topic vocabulary and images with captions. Once complete, share your report with a family member.
3. Write a definition to explain what propaganda means, then look on the Imperial War Museums – Second World War Posters webpage to look at propaganda posters that the government produced. Choose two or three posters to study. Consider who the poster was aimed at, what they wanted to achieve and how effective you think the poster was. Create your own in the style of the poster.

Electricity

1. Investigate electrical devices. Look around your home for different devices that use electricity i.e. torch, TV, remote controls etc. and work out if they run on mains electricity or batteries. Are there some that could be both? Use a Venn diagram to sort them.
2. Explore the components of an electrical circuit. Create an activity or game that will challenge Year 6 children to identify and match the symbol,

definition and image of the component. E.g.

BULB (LAMP)

A component which lights up when electricity passes through it in a circuit.
