

## Year 1 Spring 2

### Home Learning

This half term we are going to be learning about plants in our science lessons and carrying out fieldwork in our local area in geography lessons. Please choose one activity from either subject to complete.

The deadline for projects to be brought into school is **Friday 22nd March 2024.**

### Plants

1. Plant a seed during the first week of the spring term. Draw and write a plant/flower diary about the changes you see each week. Take photographs or draw pictures to show your plant/flower as they grow and change.
2. Investigate the local area and find out how many different plants there are. Use a tally chart to record the flowers you find. Show your results on a simple pictogram. Perform some data handling and consider which plant was the most common.
3. Take pictures of common trees. Think about their shape, leaves, fruit and seeds. Think about whether the trees lose their leaves or not in the autumn and whether or not the trees are familiar. Record your findings in a creative way.

### Fieldwork

1. Draw a plan or map of your ideal neighbourhood. Who would you like to have living on your street? You might choose fairytale characters, sports champions or pop stars. What type of house would your ideal neighbours have? Create a key to show features on your map. What local amenities would your residents need? For example, Rapunzel might need a hairdressers!
2. Make a leaflet or short film all about your local community. Include drawings, photographs or footage to show what you can see and do in your local area. Write or record your thoughts on what it's like to live there as well as ideas for improving it.
