

Year 5 Summer 2

Home learning

This half term, we are going to be learning about **Animals including Humans** in our science lessons. In history, we will be learning about **Ancient Greece**. The deadline for projects to be uploaded to Google Classroom or brought into school is **Monday 15^h July 2024**.

Animals including humans

1. Think of an unusual animal to have as a pet (Crocodile? Penguin? Flamingo? Giraffe?). Write an instruction manual for how to look after your pet! You need to include information about its: diet, habitat, sleeping pattern, predators or prey, what to do if it gets injured, any other special requirements.

2. We are going to learn about changes into old age. Research an animal and then draw it at different stages of its life. Include stages like infancy, later childhood and fully grown. How does the animal's body change and adapt as it gets older? Do its skin or feathers change colour? Does it grow any extra fur or teeth as it reaches adulthood?

Ancient Greece

3. The Ancient Greeks believed there were lots of gods and goddesses, each of whom ruled over a particular area of life (for example Ares was the god of war, Athena was the goddess of justice and wisdom). Choose a god or goddess and see what you can find out about them. Use your local library, or look them up online. Make a Top Trumps card detailing all their key stats. You could include categories like: strength, powers, temper, special abilities.

4. What did the Ancient Greeks eat? Their diet would have included lots of fish, olive oil, vegetables and bread. Find out the recipe for a Greek dish. Prepare the dish for your family at home and then write down what you thought of it. Did you enjoy it? Did your family like your Greek cooking? Ask an adult's help if you are using things in your kitchen.
