

Year 4 Spring 2

Home learning

This half term we are going to be learning about electricity in our science lessons and the Vikings in History lessons. Please choose **one** activity from either subject to complete.

The deadline for projects to be brought into school is Monday 23rd March 2026.

The Vikings

1. Research the Vikings and create a poster that contains at least 6 key facts about the Viking period to Britain.
2. Write a diary entry for a Viking warrior.
3. Read a book linked to our topic and prepare a summary to share with the class. Remember to include recommendations and your own thoughts on the book.

Electricity

1. Select 10 objects you find in your home. Create a table, write what material the object is made from and predict whether each is a: **Conductor** or **insulator**. Explain your reasoning (e.g. "Metal is a conductor because..."). Group objects by material (metal, plastic, wood, rubber). Research the materials and find out if your predictions are correct or not.
2. Research a famous scientist who created an important electrical invention and create a presentation to display your findings.
3. Invent your own new electrical appliance. Draw a labelled diagram and then write an explanation of how it would work.
